

PASSERO ASSOCIATES

engineering architecture

Established in 1972, Passero Associates provides architecture, engineering, planning, construction, and program management services. Our firm has been conducting business in North Florida with local municipalities and private organizations since 1999. We regularly partner with Florida coastal communities like the City of St. Augustine Beach and St. Johns County wherein most of our staff are residents.

Together with these communities we have designed and managed the construction of parks, waterfront improvements, storm water facilities, access roads, historic preservation, office complexes, churches and retail centers. Passero is active in shoreline restoration for our clients, including at Northeast Florida Regional Airport, correcting past erosion issues. We are currently working with the City of Fernandina Beach on their Marina and Waterfront Resiliency Plan.

As part of our firm's philosophy of giving, Passero returns at least ten percent of our firm's profits every year to the communities in which we work. We are happy to be a sponsor this year of the Beach Blast Off 2020, held by the City of St. Augustine Beach, and look forward to enjoying the upcoming festivities with our families, friends, and the entire community!

Service. Solutions. Results. www.passero.com.
